That date and time is clear on our schedule right now. I will put on a hold and will await more details.

Thanks.

hi ben -- please see below emails -- the event now looks set for ~10:00 am on that date, at the former diamond alkali facility, 80/120 lister ave, in newark...

please let me know if that works for the congressman.

thanks!

Subject: passaic river dredging project -- another update

hi all -- following up on the below emails -- due to recent flooding on the passaic, we experienced additional delays with this project.

so we are now shooting for a press event on monday, 10/31 (costume optional).

please let me know if that works for your respective members' schedules.

thanks.

hello again all -- following up on my 7/13 email -- due to unforeseen delays in the start of construction,

we're now looking at mid-october for the press event.

thanks, and i'll keep you posted.

hello all -- as you probably know, construction will begin this month on infrastructure to support next spring's dredging of contaminated sediment from the passaicriver in the ironbound section of newark.

we're planning a mid-september event to highlight this project and i'll keep you apprised as the details emerge.

in the meantime, if you have any questions, please contact me -- thanks!

here's a link to an on-line project fact sheet.....

<http://passaic.sharepointspace.com/Public%20Documents/Removal%20Ph%201%20Start%206-11%20Factsheet.pdf>

and attached is the latest construction timeline update.....
